

SCEPTRE POWER ® Announces Their New 300W AC-DC Desktop Power Supply With Energy Efficiency Level VI

Placentia, CA December 7, 2015 – In addition to 250W Desktop Power Supply, Sceptre Power announces their new 300W single output, high efficiency AC-DC desktop power supply in compliance with the new DoE Energy Efficiency Level VI standard. It operates with over 87.5% efficiency and has a no load power consumption of less than 0.5W. Combined with a Universal AC input of 100-240VAC, the 300W desktop comes with the standard

straight or right angle output connector, but for flexibility, many other desired connector options are available as well.

The single output desktop unit has an IEC 320-14 AC Inlet and can deliver output voltages between 12VDC – 48VDC. Equipped with convection cooling, short circuit, over-voltage, over-current, and over temperature protection, this power supply is suitable for consumer, commercial & industrial applications. It certified with UL, cUL, CB, CE, FCC, GS, PSE, BSMI and is RoHS compliant.
